WHEN SHADE MATTERS

KEY BENEFITS OF SOLARBLOCK™

LIGHTWEIGHT

Solarblock™ is a high quality knitted shade cloth with a mass of 200gsm. Manufactured in a convenient 3m width Solarblock™ is supplied folded for ease of transport and delivery.

CONSTRUCTION

Manufactured using the latest technology and machinery Solarblock™ was designed by Australians for Australians. Solarblock™ is constructed using the all familiar Z pattern which has been used extensively and successfully throughout Australia for the last 20 years.

STRENGTH

Unlike some other shade cloth fabrics Solarblock™ has a very good aspect ratio, which is the ratio of the strength in the warp compared to the strength in the weft. This makes it ideal for fit and forget installation.

HIGH UV PROTECTION

Solarblock™ has extremely high shade factors and its UVR block is up to 98.7% with a UPF factor of 78 so it provides an excellent defence against the worst of the sun's damage. Remember shade is only one part of a full UV protection programme Slip, Slop, Slap, Shade

QUALITY

Manufactured from quality HDPE resins Solarblock™ will not rot or absorb moisture.

WARRANTY

Solarblock™ has a 12 year UV warranty.

Solarblock™ is designed mainly for small to medium sized, structures and canopies in both domestic and light commercial applications.
